

hot • safe • reliable

When the stakes are high and the pressure is on you need a chafing fuel you can rely on.

Lumea Chafing Fuels deliver safe, high heat time after time, so food is kept within the temperature safety zone and your customers will go home satisfied.

The Lumea Chafing Fuel range has been carefully designed to address all of your food and beverage heating needs; choose from our **super-hot gel** with a two-hour + burn time or our **visible flame, spill-proof wick** with either a four- or six-hour + burn time.

Lumea Chafing Fuel can be used in most food and beverage heating units including beverage urns, soup tureens and chafing dishes. When the pressure is on, you can rely on the safe heat of Lumea Chafing Fuel.

Gel Chafing Fuel – 2 hour +

2 hour + 72 pack – product code 74301

- High heat output (max. temperature 90°C), our hottest fuel yet!
- 2 hour + burn time
- Consistent heat output – keeps food in the temperature safety zone above 60°C
- Rapid heat-up
- No-spill gel formula
- Resealable & reusable
- Cost-effective
- Smoke-free, odour-free, carbon monoxide-free
- Non-explosive & non-toxic
- Formula is biodegradable & water soluble
- Recyclable steel can 

Wick Chafing Fuel – 4 & 6 hour +

4 hour + 24 pack – product code 74299
6 hour + 24 pack – product code 74297

- High heat output (max. temperature 80°C)
- Long-burning: choice of 4 hour + or 6 hour + burn time
- Consistent heat output – keeps food in the temperature safety zone above 60°C
- Spill-proof design
- Visible flame
- Can stays cool, even after being lit for hours
- Can is safe to handle once flame has been extinguished – quick & easy to replace
- Resealable twist-cap, easily reusable
- Cost-effective
- Recyclable steel can

Using all Lumea Chafing Fuels

- **Take care** with an open flame product.
- Wash hands to remove any fuel residue.
- Place the can under heating equipment (e.g. a chafing dish) **before** lighting.
- Ensure the can is securely in position in the equipment **before** lighting.
- Use a long-handle match or a butane lighter to light the can.
- Don't use a lit can to light another can.
- Never position a can on a table top or on table linen.
- Never handle or carry a lit can.
- Never carry heating equipment (e.g. a chafing dish) with lit cans inside.
- Keep hair, clothing, table linen and all other combustible items away from the flame.
- Don't leave a burning can unattended.
- Never use your hands to extinguish a flame.
- Replace the lid/cap before disposal to prevent any fuel leakage.

Using Lumea Twist-Cap & Wick Fuel

- Extinguish the flame by blowing it out.
- Allow wick to cool sufficiently after extinguishing the flame **before** moving the can.
- Don't touch the wick after the flame has been extinguished.

Using Lumea Gel Fuel

- **Take care** – the flame on gel chafing fuel is barely visible.
- Use a blunt object (e.g. a spoon) to open the lid.
- Don't use a sharp object (e.g. a knife) to open the lid.
- Place your hand over the lid when opening a can.
- Remove excess gel from the lid using a blunt object.
- Never remove excess gel from the lid with your finger or clothing.
- Never handle or carry a lit can – they can become very hot!
- Use a small non-flammable object (e.g. a saucer) to extinguish the flame – **never attempt to blow out the flame**.
- Don't touch a can for some time after it is extinguished – the can takes a while to cool.
- If you are handling gel chafing fuel wear appropriate protective clothing and gloves.

Storage & Disposal of Lumea Gel Fuel

- Keep cans/refill containers out of the reach of children.
- Store can/refill container with the lid tightly closed.
- Store away from all sources of ignition – **do not smoke**.
- Gel chafing fuel should be stored in a well-ventilated and secure (locked) area.
- When empty, dispose of in an environmentally safe manner.
